## ABOUT SUNON

Over 41 years, SUNON has specialized in various types of thermal solutions related to motors, fans, and ventilators for a wide range of applications. We offer optimal thermal solutions and prompt responses to clients' needs, with customer service and technical support networks all around the world.

## SUNON's Total Solution

- ✓ Increases product profitability
- ✓ Reduces development costs and increases profits
- ✓ Decreases prototype development time
- ✓ Provides the most economic design solution

# SUNON Comprehensive Thermal Solution and Technical Support Service

SUNON is an original cooling product manufacturer. We are 100% research-based, designing and manufacturing a variety of fans, vapor chambers and heat pipes and more, We can configure both active and passive cooling components to provide our clients a full range of cooling solutions through the use of scientific simulation and equipment. SUNON aims to give excellent service in thermal solutions, satisfying clients' thermal requirements for any function, sizes, and budget.

## CMSEM One-Stop Thermal Solution Service

SUNON provides a set of CMSEM services, designing thermal solutions from scratch. We work together with our clients to design the best thermal modules for their individual needs. Then, we create a model to simulate and optimize each module's thermal performance, which is passed through various estimation and mass-production phrases. Through collaboration, the highest quality of service, and a timesaving process of solving heat problems, SUNON provides our clients with optimal thermal solutions.

## Cold Plates

### Application

Industrial Equipment  
Inverter Drive  
ADAS ECU

- Greater thermal efficiency, suitable for applications with high power density and in need of quick power transfer.
- Compact design for limited spaces and flexible customization of our liquid cold plates to suit your needs.
- Leaking safety and high reliability assured based on the strong thermal design and stimulation analysis on request.

## Air Cooling Solution

- Customized air cooling configuration design : ADC and AL and fan die-casting techniques.
- Space utilization and maximal thermal effectiveness.

## Vapor Chamber & Cold Plate Solution

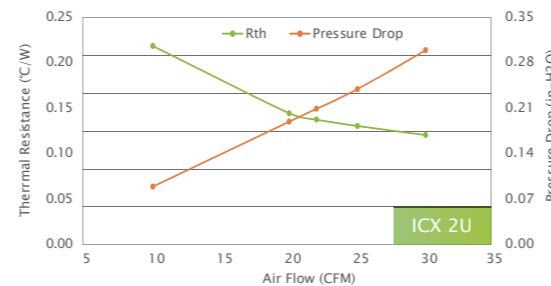

- Slim-shaped design and suitable for limited system spaces.
- Flexible and customized design that sustains high thermal effectiveness.
- Steady and fast thermal uniformity that ensures better system function.

## 5G Networking

We customize a full range of cooling solutions to offer the best thermal solutions, meeting clients' goals and needs for any function, sizes, and budget.

## High Power Heat Pipe Solution

- > Higher level thermal conductivity : 92~100w TDP.
- > Excellent thermal equilibrium, 80% plus increase in thermal effectiveness.
- > Can be configured with other components for high powered applications to reduce thermal resistance.

## For Intel CPU Coolers and Edge and Storage

> SUNON introduces and develops the latest thermal specification for Intel server CPU coolers and various custom-design cooling modules, to fully satisfy networking applications' thermal needs.

## Immersion Cooling Solution Water Block Solution

- > Low vibration and power-saving module
- > Low maintenance and enhanced system effectiveness
- > High reliability

## For Switch and Router

> Cooling solutions with a wide range of thermal design power from 20w to 2000w depending on systems' needs.

# Automotive

~20W

## Heat Sink+Fan

- Economic design solution
- Minature module size
- Efficient heat dissipation

Application LED head light, Ambient lighting, Beam light...

50W

## Heat Pipe

- Overcome space limitation
- Efficient heat transfer
- Flexible design feasibility

Application HUD, ADAS, EV car charger, onboard charger...
